SUSTAINABILITY

Sustainability is at the forefront of the design process at Asia Hub, with every range made from 100% sustainable fibers. Designing with people and the planet in mind means we are conscious of the entire uniforms process.

■ DESIGN

There are three key areas that we review when considering sustainability in design:

Fabrication - We use 100% sustainable fibers to create every range.

Waste / Remnant Fabric - We are continually innovating processes to use our waste and remnant fabric.

Longevity - Asia Hub designs are made to be durable and timeless. The style of garments remains on-trend / Made with premium quality materials to be a long-wearing staple.

■ SUSTAINABLE FIBRES

Asia Hub Sustainable Fabrics Standard was developed using base data from Higg MSI, life-cycle analysis, garment care implications, and circularity allowing us to effectively rank fabrics based on their environmental impact and hand-pick the most sustainable fibers within our production process.

Organic Cotton.

- Fair Production
- No (GMO) Genetically Modified Seeds
- No Herbicides Or Pesticides
- Super Soft On Skin
- Hypoallergenic
- Biodegradable

BENEFITS

91%
Less Water

The graphic features a background of cotton plants and fluffy cotton bolls. The text is white and centered, with a water drop icon next to the percentage.

Recycled Poly.

- Free From Toxic Materials
- Diverts Waste
- 100% Recycled
- Endless Life Cycle
- UV Resistant
- Mildew Resistant

BENEFITS

86%
Less Water

The graphic features a background of recycled plastic bottles and spools of thread. The text is white and centered, with a water drop icon next to the percentage.

■ SUPPLY CHAIN

At Asia Hub, we are committed to creating and developing long-term partnerships with factories that share a common vision of sustainability, accountability, and transparency.

This means ensuring that our workers are treated with respect and dignity, earn a fair wage, and have opportunities to foster their skills. From the farmers, weavers, sewers, and cleaners, we want to make sure that at all stages, we are creating a positive impact on the lives of the people who make our clothes.

■ PACKAGING

Our packaging is 100% compostable, contributing to our zero waste initiative.

Bags - Our garments are packed in garment bags made from renewable and sustainable plant materials as well as non-toxic, compostable resin making them 100% home compostable. Both bags can simply be popped into the green compostable bin, but we recommend adding them to your home compost to feed the worms or using them as your compostable bin bag before it goes into the green bin.

Swing Tags - Our product swings tags are made from 100% recycled cards.

■ TRANSPORTATION

Net zero carbon is a goal at Asia Hub, so we have begun proactively addressing the CO2 footprint of our production import freight services performed by our logistics suppliers, including airlines, train lines, and shipping companies.

In this exciting first step, all our inbound production shipments are now carbon neutral.

Working with our partner, our import logistics net zero carbon program leverages three fields of action: detection, reduction, and compensation of CO2. We select services based on CO2 efficiency ratings to minimize emissions.
